

October 14, 2018, Moscow, Russia

The 3rd International School for young scientists “Physics, Engineering and Technologies for Biomedicine”

The 3rd International school for medical doctors and young scientists “Physics, Engineering and Technologies for Biomedicine” will be held 14 October 2018 in Moscow, Russia. This School will be held in the framework of the 3rd International Symposium on «Physics, Engineering and Technologies for Bio-Medicine», 15-17 October 2018, Moscow, Russia. The Organizer of School is Institute of Engineering Physics for Biomedicine (PhysBio) of MEPhI.

The event will provide medical doctors, students and young scientists an opportunity to listen to the lectures on the following topics:

- Nuclear nanomedicine
- Innovative technologies of radiotherapy
- Biomedicine nanotechnologies
- Nanobioengineering
- Biomedicine photonics
- Nanotheranostics
- Plasma and laser technologies for biomedicine
- Translational medicine

The School will be held in the Intourist Kolomenskoe, Kashyrskoye shosse, 39b, Moscow, Russia.

Please note the following important information:

The official languages of the School are English and Russian.

There is no registration fee.

Deadline for registration: **October 7, 2018**

Deadline for registration of the foreign citizens who need visa: **September 1, 2018**

The Organizing Committee offers accommodation in the hotel complex of MEPhI for nonresidents and foreign participants of the School on the paid basis. Meals will be also at the expense of participants.
